RE: Solid Waste
U.S. Navy C/D Landfill, Permit #286
Closure Plan

Dear Mr. Gonyo:

Your submittal on July 5, 1990 regarding the changes to the closure plan for the Norfolk Naval Station C/D Landfill has been reviewed. The original closure plan was approved in January 1989.

The revised plan incorporated a gravel road adjacent to the north side of the landfill and the use of a synthetic cap. Based on the information submitted, approval of this revised closure plan is granted. However, the DWM recommends the use of a HDPE or PVC synthetic cap. Closure activities in accordance with this approved plan shall be completed within six months after receipt of this letter. Once completed, certification of this closure must be submitted to the Department of Waste Management (DWM) and a request made for a DWM representative to inspect the closed landfill.
